

Peak to Peak is going Green with community service reporting!

We are now using an online tracking and reporting system for all Service hours called x2VOL. This system will allow us to eliminate our paper forms and centralize the information. x2VOL will allow students to enter their Community Service hours online at any time, as well as check for any volunteer opportunities and sign up for them, receive reminders about the opportunities, and print a service hour log that can be used for college applications.

From this point on, all service hours will be entered into the x2VOL system. Please view the short powerpoint or videos below to learn how to register and log hours. Students will log in through their Naviance portal (the link for x2VOL is on the lower left under 'Resources').

Some service opportunities will require students to upload a picture or other document verifying their service (for ex., a before and after picture after shoveling an elderly neighbor's driveway, or a picture of a fleece blanket they made for Project Linus).

Stay tuned for info. on many P2P clubs that will begin using x2VOL for service hour submission!

Please use the below resources to familiarize yourself with x2VOL and learn how to report service.
